Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-17 are rejected under 35 U.S.C. 102(B) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Sutton (U.S. Patent No. 6,103,112). The claims are considered to read on Sutton (U.S. Patent No. 6,103,112). However, if a difference exists between the claims and Sutton (U.S. Patent No. 6,103,112), it would reside in optimizing the steps of Sutton (U.S. Patent No. 6,103,112). It would have been obvious to optimize the steps of Sutton (U.S. Patent No. 6,103,112) to enhance separation.

Claims 5, 6, 9, and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sutton (U.S. Patent No. 6,103,112) in view of Nickerson (U.S. Patent No. 6,423,120). At best, the claims differ from Sutton (U.S. Patent No. 6,103,112) in reciting up to several hundred watts. Nickerson (U.S. Patent No. 6,423,120) (column 5, lines 35-45) discloses a typical heater must be configured from 60 watts to achieve reasonable heat-up rates. It would have been obvious to use 60 watts in Sutton (U.S. Patent No. 6,103,112) because Nickerson (U.S. Patent No. 6,423,120) (column 5, lines

Art Unit: 1797

35-45) discloses a typical heater must be configured from 60 watts to achieve reasonable heat-up rates.

The restriction and elections of species requirements have been reconsidered, deemed proper, and made final for the reasons of record.
